Top Skills

MongoDB
Unit Testing (NUnit/xUnit)
CI/CD Pipeline

Languages

Hindi (Native or Bilingual)
English (Professional Working)

Certifications

AWS Academy Cloud Foundations
Docker Certification
ASP.NET Core
Cisco certified Programming
Essentials in Python
SQL : The Programming of
Database

Honors-Awards

Winning A WebDevelopment
Competition
Color Coat in Wrestling
Internal Smart India Hackathon
victory

Arjun singh Rahal

Software Engineer | E-commerce Platform Development | .NET Core
• React • Python | Building Artifi & Znode Products
Mumbai, Maharashtra, India

Summary

I build scalable e-commerce platforms that handle thousands of transactions. Currently an Associate Software Engineer at Amla Commerce, where I develop features for Artifi and Znode—enterprise-grade e-commerce solutions used by businesses worldwide. I work across the full stack: .NET Core backends, React frontends, database optimization, and cloud deployment. My journey into software engineering started with curiosity. During college at Sipna College of Engineering, I wasn't satisfied just attending lectures—I wanted to build. So I did:→ Completed 4 internships across different tech domains (Python, data science, web development, full stack)→ Built 15+ projects including a hands-free virtual mouse controlled by eye movements→ Went from intern to trainee to Associate Software Engineer in 12 months at Amla Commerce. What drives me? Solving real problems with code. I love the moment when you finally crack a complex algorithm, when your optimization cuts load time in half, or when a feature you built goes live and users actually use it. :- Backend: .NET Core, ASP.NET, C#, Python, Django, Flask- Frontend: React.js, JavaScript, HTML/CSS- Database: SQL, PostgreSQL, MongoDB- Cloud & Tools: Docker, Git, RESTful APIs, Microservices- Data Science: Machine Learning, TensorFlow, Pandas, NumPy ' :Building robust APIs and scalable architectures for high-traffic e-commerce platforms. Recently earned certifications in ASP.NET Core and Docker to level up my containerization game.' :If you're building something interesting in e-commerce, fintech, or SaaS—or if you want to talk .NET, React, or software architecture—send me a message. Always happy to connect with fellow engineers, tech leaders, and problem-solvers. Available for interesting conversations, collaborations, and opportunities.

Experience

Amla Commerce (Creator of Artifi and Znode)

2 years 9 months

Associate Software Engineer

January 2025 - Present (1 year 9 months)

Associate Software Engineer

Amla Commerce (Creator of Artifi and Znode)

Jan 2025 - Present | On-site

- Developing full-stack features for Artifi and Znode e-commerce platforms serving 500+ enterprise clients
- Built and optimized RESTful APIs using .NET Core 8, reducing API response time by 35%
- Implemented React components for product customization modules, improving user engagement by 20%
- Collaborate with cross-functional teams to deliver scalable microservices architecture
- Participate in code reviews and mentor junior developers on best practices

Trainee software engineer

July 2024 - Present (2 years 3 months)

Nagpur

Trainee Software Engineer

Amla Commerce (Creator of Artifi and Znode)

Jul 2024 - Dec 2024 (6 months)

- Transitioned from intern to trainee role, taking ownership of production feature development
- Developed 10+ API endpoints for inventory management system using ASP.NET Core and Entity Framework
- Built dynamic UI components in React.js for admin dashboard, reducing manual processing time by 40%
- Fixed 50+ bugs and improved code quality through unit testing (NUnit) and integration testing
- Containerized applications using Docker, streamlining deployment process across dev and staging environments

Intern

January 2024 - July 2024 (7 months)

Nagpur

Intern

Amla Commerce (Creator of Artifi and Znode)

Jan 2024 - Jul 2024 (7 months) | Nagpur, Maharashtra, India

- Selected for 6-month internship working on enterprise e-commerce platforms (Artifi & Znode)
- Contributed to backend development using .NET Core, implementing CRUD operations for product catalog features
- Assisted in database optimization tasks, improving query performance by 25%
- Learned agile development practices, participating in daily standups and sprint planning
- Earned promotion to Trainee Software Engineer based on performance and contributions

Cognifyz Technologies

Python Developer Intern

December 2023 - January 2024 (2 months)

Python Developer Intern

Cognifyz Technologies (Remote)

Dec 2023 - Jan 2024 (2 months)

- Developed REST APIs using Flask framework for internal automation tools
- Built database schemas and implemented CRUD operations using PostgreSQL and SQLAlchemy ORM
- Created Python scripts to automate data processing workflows, saving 5+ hours/week of manual work
- Gained hands-on experience with Git version control and collaborative coding in an agile team environment

Oasis Infobyte

Data Science Intern

August 2023 - September 2023 (2 months)

Data Science Intern

Oasis Infobyte (Remote)

Aug 2023 - Sep 2023 (2 months)

- Built machine learning models to predict customer behavior with 82% accuracy using Python, Scikit-Learn, and Pandas
- Performed exploratory data analysis (EDA) on datasets with 10,000+ records, identifying key patterns and trends

- Developed a Titanic survival prediction model using classification algorithms (Logistic Regression, Random Forest)
- Created data visualizations using Matplotlib and Seaborn to communicate insights to non-technical stakeholders

ICEICO Technologies Pvt. Ltd.

Web Development Intern

June 2023 - August 2023 (3 months)

Nagpur

Web Development Intern

ICEICO Technologies (On-site)

Jun 2023 - Aug 2023 (3 months) | Nagpur, Maharashtra, India

- Developed responsive web interfaces using React.js, HTML5, CSS3, and JavaScript
- Implemented 5+ reusable UI components for client projects, reducing development time by 30%
- Integrated frontend with backend APIs, handling asynchronous data fetching and state management
- Collaborated with designers to translate Figma mockups into pixel-perfect React components

Education

Sipna College of Engineering & Technology, Amravati

Bachelor of Engineering - BE, Computer Engineering · (February 2020 - July 2024)

Sant Gadge Baba Amravati University, Amravati

Bachelor of Engineering - BE, Computer Science & Engineering · (February 2020 - February 2024)
