

ARJUN SINGH RAHAL

.NET DEVELOPER / SOFTWARE ENGINEER

+91-8378085788 | rahalarjunsingh@gmail.com | linkedin.com/in/arjunrahal | github.com/rahalarjunsingh | [Portfolio](#)

Professional Summary

Results-driven .NET Developer with nearly 3 years of experience designing and deploying enterprise-grade web applications and microservices. Expert in building scalable RESTful APIs using C#, ASP.NET Core, and SQL Server. Proven track record of optimizing backend performance, modernizing order workflows, and implementing robust third-party integrations, including Stripe payments and USPS shipping, to deliver secure and highly available software solutions.

Technical Skills

Languages & Runtimes: C#, .NET 8, .NET Core, ASP.NET Core, ReactJs, TypeScript, JavaScript, SQL
Backend & Architecture: Web API, RESTful APIs, Microservices, Entity Framework Core, Domain-Driven Design, JWT
Database & Caching: Microsoft SQL Server, PostgreSQL, MySQL, Redis, Distributed Caching
Cloud & DevOps: Azure, Azure DevOps, Docker, CI/CD Pipelines, Git, GitHub
Testing: xUnit, Moq
Monitoring & Observability: New Relic
Tools & Practices: Visual Studio, Swagger/OpenAPI, Postman, JIRA, Agile/Scrum, Object-Oriented Programming

Professional Experience

Software Engineer (Full Stack .NET Developer)

Jan 2024 – Present

Amla Commerce

Nagpur, India

- Developed a secure Zero-Dollar Authorization flow and integrated Stripe payment services via secure webhooks in ASP.NET Core, minimizing multi-gateway validation failures and automating transaction workflows.
- Engineered a modular Shipping Manager Microservice integrating USPS address validation and multi-carrier APIs, utilizing in-memory caching to reduce rate-fetching latency by 40%.
- Optimized Order Management System (OMS) workflows and tuned SQL Server stored procedures, improving RESTful API performance and response times by 25%.
- Refactored the Tax Manager Service with AvaTax API integration, isolating complex tax rules to ensure calculation accuracy and continuous regulatory compliance.
- Collaborated within an Agile environment to mentor junior developers in API design, standardizing code review practices and increasing team delivery velocity by 15%.

Technical Projects

ShopScale E-Commerce & Payment Integration Platform | C#, ASP.NET Core, Redis, Docker

- Designed a Docker-containerized e-commerce backend utilizing Domain-Driven Design (DDD) with automated Azure DevOps CI/CD pipelines to enable independent microservice scaling.
- Built a tokenized payment platform with REST APIs and webhook callbacks for real-time payment status updates and reliable transaction reconciliation.
- Integrated Redis distributed caching for product catalog services, significantly reducing database load by 30–40% during peak concurrent transactions.

AI Stock Analyzer — Agentic Inventory Insights | Python FastAPI, Azure OpenAI, React, TypeScript

- Built a Python FastAPI data pipeline and integrated Azure OpenAI to analyze inventory turnover and generate actionable stock optimization recommendations.
- Delivered a React and TypeScript dashboard enabling inventory planners to securely inspect AI-ranked SKUs and supporting performance metrics in a unified view.

Education & Achievements

Bachelor of Engineering in Computer Science

Jun 2024

Sant Gadge Baba Amravati University

CGPA: 9.1/10.0

- **Achievements:** LeetCode 100 Days Badge (2026, 150+ problems solved); Smart Hackathon 2023 Winner
- **Certifications:** ASP.NET Core (Udemy, 2026), Docker: Basics to Advanced (Udemy, 2026), AWS Academy Cloud Foundations
